

The 7th International Conference on Extreme Learning Machines (ELM2016)

Maria Bay Sands, Singapore

December 13 - 15, 2016

Organizer: Nanyang Technological University, Singapore
Co-Organizers: University of Oxford, UK; Tsinghua University, China

Call for Papers 3rd

Extreme Learning Machines (ELM) aim to break the barriers between the conventional artificial learning techniques and biological learning mechanism. ELM represents a suite of (machine or possibly biological) learning techniques in which hidden neurons need not be tuned. ELM theories show that effective learning algorithms can be derived based on randomly generated hidden neurons (with almost any nonlinear piecewise activation functions), independent of training data and application environments. Increasingly, evidence from neuroscience suggests that similar principles apply in biological learning systems. ELM theories and algorithms argue that “random hidden neurons” capture an essential aspect of biological learning mechanisms as well as the intuitive sense that the efficiency of biological learning need not rely on computing power of neurons. ELM theories thus hint at possible reasons why the brain is more intelligent and effective than current computers. ELM offers significant advantages over conventional neural network learning algorithms such as fast learning speed, ease of implementation, and minimal need for human intervention. ELM also shows potential as a viable alternative technique for large-scale learning and artificial intelligence.

The main theme of ELM2016 is: **Big Data, Hierarchical Machine Learning and Biological Learning**

Organized by Nanyang Technological University, Singapore, and co-organized by University of Oxford, UK, and Tsinghua University, China, ELM2016 will be held in the beautiful island-country of Singapore. This conference will provide a forum for academics, researchers and engineers to share and exchange R&D experience on both theoretical studies and practical applications of the ELM technique and biological learning.

Accepted papers presented in this conference will be published in conference proceedings and selected papers will be recommended to reputable ISI indexed international journals:

Neurocomputing, Neural Computing and Applications, Cognitive Computation, International Journal of Machine Learning and Cybernetics, and Memetic Computing.

Topics of interest:

All the submissions must be related to ELM technique. Topics of interest include but are not limited to:

Theories

- Universal approximation, classification and convergence
- Robustness and stability analysis
- Biological learning mechanism and neuroscience
- Machine learning science and data science

Algorithms

- Real-time learning, reasoning and cognition
- Sequential/incremental learning and kernel learning
- Clustering and feature extraction/selection/learning
- Random projection, dimensionality reduction, and matrix factorization
- Closed form and non-closed form solutions
- Hierarchical solutions, and combination of deep learning and ELM
- No-Prop, Random Kitchen Sink, FastFood, QuickNet, RVFL, Echo State Networks
- Parallel and distributed computing / cloud computing

Applications

- Time series prediction, smart grid and control engineering
- Pattern recognition
- Social media and video applications
- Biometrics and bioinformatics
- Security and compression
- Human computer interface and brain computer interface
- Cognitive science/computation
- Sentic computing, natural language processing and speech processing
- Big data analytics

Paper submission:

Only full-length manuscripts with good journal of quality will be considered by this conference. Details on manuscript submission can be found in <http://elm2016.extreme-learning-machines.org>.

Important dates:

Paper submission deadline: July 1, 2016
Notification of acceptance: August 1, 2016
Registration deadline: September 1, 2016

Honorary Chair

Bernard Widrow, Stanford University, USA

International Advisory Committee Chair

Soon Fatt Yoon, Nanyang Technological University, Singapore

General Chairs

Guang-Bin Huang, Nanyang Technological University, Singapore

M. Brandon Westover, Harvard Medical School, USA

Organizing Chairs

Meng-Hiot Lim, Nanyang Technological University, Singapore

Newton Howard, University of Oxford, UK

Fuchun Sun, Tsinghua University, China

Program Chairs

Erik Cambria, Nanyang Technological University, Singapore

Amaury Lendasse, University of Iowa, USA

Yoan Miche, Nokia Solutions and Networks, Finland

Chi Man Vong, University of Macau, Macau

Local Arrangement Chair

Hao Yu, Nanyang Technological University, Singapore

Publication Chair

Jiuwen Cao, Hangzhou Dianzi University, China

Area Chairs

Aryaz Baradarani, University of Windsor, Canada

Kaj-Mikael Björk, Arcada University of Applied Sciences, Finland

Huajun Chen, Zhejiang University, China

Yiqiang Chen, Chinese Academy of Science, China

Jin Seo Cho, Yonsei University, Korea

Chenwei Deng, Beijing Institute of Technology, China

Zhao Yang Dong, University of Sydney, Australia

Qing He, Chinese Academy of Science, China

Vijay Manikandan Janakiraman, NASA Ames Research Center, USA

Nan Liu, Singapore General Hospital, Singapore

Bao-Liang Lu, Shanghai Jiaotong University, China

Muhammad Rizwan, George Institute of Technology, USA

Emilio Soria, University of Valencia, Spain

Xi-Zhao Wang, Shenzhen University, China

Zhu Liang Yu, South China University of Technology, China

Finance Chair

Qi Cao, Nanyang Technological University, Singapore

International Advisory Committee

Bir Bhanu, University of California, Riverside, USA

Amir Hussain, University of Stirling, UK

Hisao Ishibuchi, Osaka Prefecture University, Japan

Yoshifusa Ito, Aichi Medical University, Japan

Yaochu Jin, University of Surrey, UK

Vincenzo Piuri, Università degli Studi di Milano, Italy

Kay Chen Tan, National University of Singapore, Singapore

Michel Verleysen, Université catholique de Louvain, Belgium

Jun Wang, City University of Hong Kong, China

Zidong Wang, Brunel University, UK

Zong-Ben Xu, Xi'an Jiaotong University, China

Min Yao, Zhejiang University, China

Xin Yao, University of Birmingham, UK

Zhengyou Zhang, Microsoft Research, Redmond, USA
