

A background image showing a person's hands typing on a laptop keyboard. Overlaid on the image are various digital icons and graphics, including a network of nodes and lines, a globe, and labels like 'AI', 'DEEPFAKE', and 'FAKE NEWS'. The overall theme is artificial intelligence and technology.

AI TECHNOLOGY SUMMER SCHOOL 2021

2-6 AUGUST
(MON – FRI)

Fully Online Programme

Programme Highlights

- Keynote Addresses from Distinguished Speakers
- Special focus on Fake Media, AI for Health, and other topics
- Hands-on ML workshop from Microsoft
- Competitions from Amazon and Terra.AI with prizes
- Poster Sessions for Participants
- And many more...

AI Singapore is pleased to bring to you the AI Technology Summer School this year.

Learn about Artificial Intelligence and Machine Learning from renowned speakers and practise applying the knowledge you have learnt in hands-on workshops and competitions.

Find out about the exciting possibilities surrounding the use of AI in real-world application domains.

Network with other participants as well as the experts from industry and academia.

Who Can Participate

The programme is designed for participants with a computer science background or similar experience. It is open to graduate and undergraduate students, academic researchers, and industry professionals.

APPLICATION IS NOW OPEN
