AI SINGAPORE®

TRUSTED MEDIA CHALLENGE

Fake media is an existential threat to societies today. If left unchecked, it risks becoming a serious national security concern.

AI Singapore is launching the Trusted Media Challenge to test out solutions and explore how Artificial Intelligence (AI) technologies can be leveraged to combat fake media.

TARGET AUDIENCE

- Researchers and Industry Professionals from around the world

- Anyone who is interested and/or experienced in machine learning, deep learning, computer vision especially in media forensics

CHALLENGE MECHANISM

Teams will submit their solution (codes and models) via the Challenge Platform. The platform will rank the submissions automatically in the leaderboard.

KEY HIGHLIGHTS

Datasets will focus on fake video and fake audio

Build Machine Learning classifiers which are robust and accurate

Platform for researchers and engineers to contribute ideas and advance the state-of-the-art in fake media detection

CHALLENGE PERIOD

15 July - 15 December 2021

PRIZES

Winners of this Challenge will stand a chance to win prize monies of up to SGD700K (approx. USD500K)
