International Conference on Localization and GNSS 2023
Castellón, Spain, June 6-8, 2023

General Chairs

Jari Nurmi, TAU, Finland
Joaquin Huerta, UJI, Spain

TPC Chairs

Joaquin Torres Sospedra, U Minho, Portugal
Elena Simona Lohan, TAU, Finland

Publicity Chair

Aleksandr Ometov, TAU, Finland

Steering Committee

Jari Nurmi, TAU, Finland (chairman)
Fabio Dovis, Politecnico di Torino, Italy
Joaquin Huerta, UJI, Spain
Heidi Kuusniemi, U Vaasa, Finland
Elena Simona Lohan, TAU, Finland
Jose Lopez-Salcedo, UAB, Spain
Terry Moore, U Nottingham, UK
Adriano Moreira, U Minho, Portugal
Alexander Rügamer, Fraunhofer IIS, Germany
Stephan Sand, DLR, Germany
Gonzalo Seco Granados, UAB, Spain
Joaquin Torres Sospedra, U Minho, Portugal

Technical Program Committee

Grigorios Anagnostopoulos, HES-SO, Switzerland
Octavian Andrei, RHEA Group, Finland
Rafael Berkvens, U Antwerp, Belgium
Zahidul Bhuiyan, NLS/FGI, Finland
Liang Chen, WHU, China
Pau Closas, Northeastern University, USA
Fabio Dovis, Politecnico di Torino, Italy
Emanuela Falletti, Leonardo S.p.A., Italy
Ignacio Fernandez-Hernandez, EC, Belgium
Michele Girolami, ISTI-CNR, Italy
Mike Koivisto, TAU, Finland
Heidi Kuusniemi, U Vaasa, Finland
Nicola Linty, Argotec, Italy
Elena Simona Lohan, TAU, Finland
Jose Lopez-Salcedo, UAB, Spain
Filipe Meneses, Univ. of Minho, Portugal
Nikolay Mikhaylov, Bosch, Germany
Alex Minetto, Politecnico di Torino, Italy
Adriano Moreira, Univ. of Minho, Portugal
Maria Nicolau, Univ. of Minho, Portugal
Fernando Nunes, Instituto de Telecomunicacoes, Portugal
Jari Nurmi, TAU, Finland
Aleksandr Ometov, TAU, Finland
Lorenzo Ortega, IPSA Toulouse, France
Marco Porretta, EUSPA, Czechia
Alexander Rügamer, Fraunhofer, Germany
Laura Ruotsalainen, University of Helsinki, Finland
Stephan Sand, DLR, Germany
Gonzalo Seco Granados, UAB, Spain
Benjamin Siebler, DLR, Germany
Joaquin Torres Sospedra, U Minho, Portugal
Sabrina Ugazio, Ohio University, USA
Jesus Ureña, University of Alcala, Spain
Klaus Witrisal, TU Graz, Austria

Conference scope: Reliable navigation and positioning are becoming essential in applications for IoT in industry and logistic applications, in smart city environments, for safety-critical purposes, in public services and consumer products to guarantee transparent, efficient and reliable workflows. A robust localization solution, which will be available continuously is needed regardless outdoor or indoor, and on different platforms. ICL-GNSS addresses the latest research on wireless and satellite-based positioning techniques to provide reliable and accurate position information with low latency. The emphasis is on the design of mass-market navigation receivers and related tools and methodologies, but also many kinds of sensing devices, wireless systems with localization capabilities, and location-aware applications are within the scope of ICL-GNSS.

Topics of interest include but are not limited to:

- Antennas and RF front-end for GNSS receivers
- Design, prototyping and testing of positioning devices
- Acquisition, tracking and navigation algorithms
- Detection and mitigation techniques for adverse propagation conditions
- Wireless and sensor-based localization
- GNSS applications for remote sensing, ionospheric sounding and space weather
- Precise timing for GNSS and terrestrial systems
- Authentication, security and/or privacy in navigation systems and location-aware communication
- Radar and radio-based sensing
- Spoofing and jamming countermeasures
- Cooperative and peer-to-peer positioning
- Positioning based on signals-of-opportunity
- Multi-GNSS receivers and emerging navigation satellite systems
- Indoor positioning and localization in densely populated urban areas
- Hybrid NAV/COM positioning
- Cognitive positioning architectures
- Positioning for autonomous systems
- Device-free localization
- 5G Positioning
- Context awareness

Paper submission: Submitted papers must represent original material that is not currently under review in any other conference or journal and has not been previously published. Papers should be four to six pages long in the specified format (references on page 7 allowed). Papers should be submitted as pdf files prepared according to IEEE two-column A4 format guidelines. We invite you to submit your original full papers on the most recent results and technology trends in the fields of positioning. Accepted and presented papers will be published in electronic conference proceedings.

Traditionally, ICL-GNSS papers will be submitted to IEEE Xplore for inclusion in the database and indexing. A virtual special issue in an open-access journal will be edited after the conference based on extended top-tier papers from the conference.

Since 2020 we also have another track for industry/work-in-progress papers. It runs as an interleaved workshop *WIPHAL: Work-in-Progress in Hardware and Software for Location Computation*. The papers accepted to the workshop will be submitted to the CEUR-WS.org, an open-access repository indexed by Scopus, Ei Compendex and DBLP. For those proceedings, minimum 5-page single-column format will be used. All papers submitted to ICL-GNSS and WIPHAL will undergo a similar peer review based on the full-length paper.

Contacts and Information https://events.tuni.fi/icl-gnss2023 and iclgnss@tuni.fi

Dates and Deadlines

Special session proposals: January 28, 2023

Full paper submission: February 15, 2023
WIPHAL papers: Abstract March 28, 2023, full paper upload by April 11
Notification of acceptance: April 4, 2023 (WIPHAL April 25)
Camera-ready papers: April 25, 2023 (WIPHAL May 15)
